

# Snow Canon

(not to be confused with a snow cannon)

DMS

Voice

It's cold, so cold! It's blus - ter - y and flus - ter - y. The

snow is swirl - ing in the air! \_\_\_\_\_

\* Oh, how I wish it would last and \_\_\_\_\_ last. I'd

build the big - gest snow \_\_\_\_\_ man \_\_\_\_\_ a - ny - where! \_\_\_\_\_

The canon work best as indicated. But if you don't mind a couple of crunchy passing tones, it also works at 4 measures.

A word about encouraging independent singing: I deliberately began each phrase with the final note of the previous one. Hopefully, that will lessen the panic of grasping for the next pitch; maybe individuals will find it less scary to sing a phrase (or the whole song) alone. Maybe not, but I am hopeful!
